

One PhD position in combinatorial algorithms is available at Charles University, at the Department of Theoretical Computer Science and Mathematical Logic. The position is partially funded by the project "Principles of combinatorial generation" from the Czech Science Foundation investigated by Petr Gregor (<http://ktiml.mff.cuni.cz/~>) and Torsten Mütze (<http://tmetze.de/>). The starting date for the position is October 1st, 2022 or by mutual agreement.

We invite applications of candidates with a strong background in discrete mathematics or theoretical computer science. Applicants should send their CV with a research statement and one recommendation letter electronically to gregor@ktiml.mff.cuni.cz or torsten.mutze@mff.cuni.cz by April 20th, 2022.

Informal enquiries about the position are welcome.
